

TP-Link Set Up Guide.

Upon receiving your TP-Link, connect it to your standard router by ethernet cable and power on.

Using your device, connect to the TP-Link Wifi Network, the security password will be on the back of your TP-Link Router.

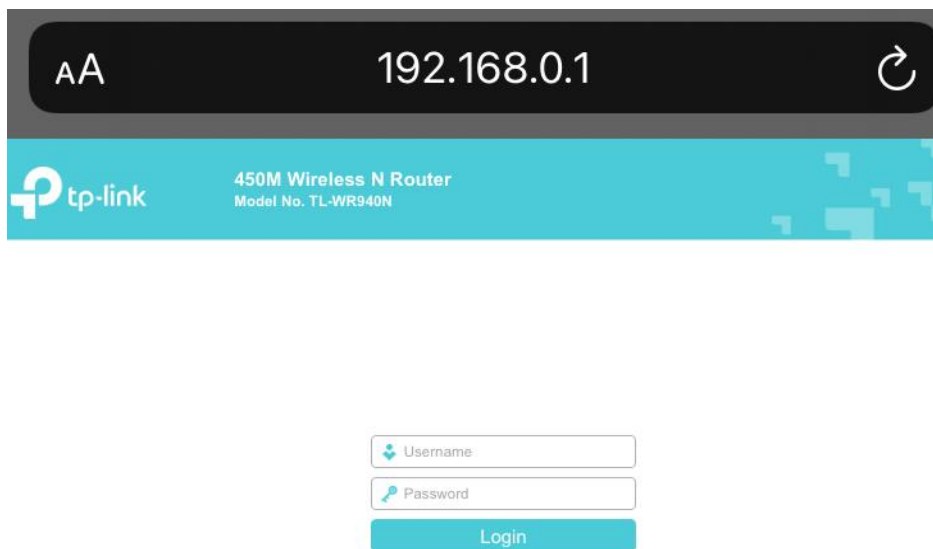

To add the VPN server, using any browser (phone, laptop) whilst connected to the TP-Link network.

Enter the following code into the router:

192.168.0.1

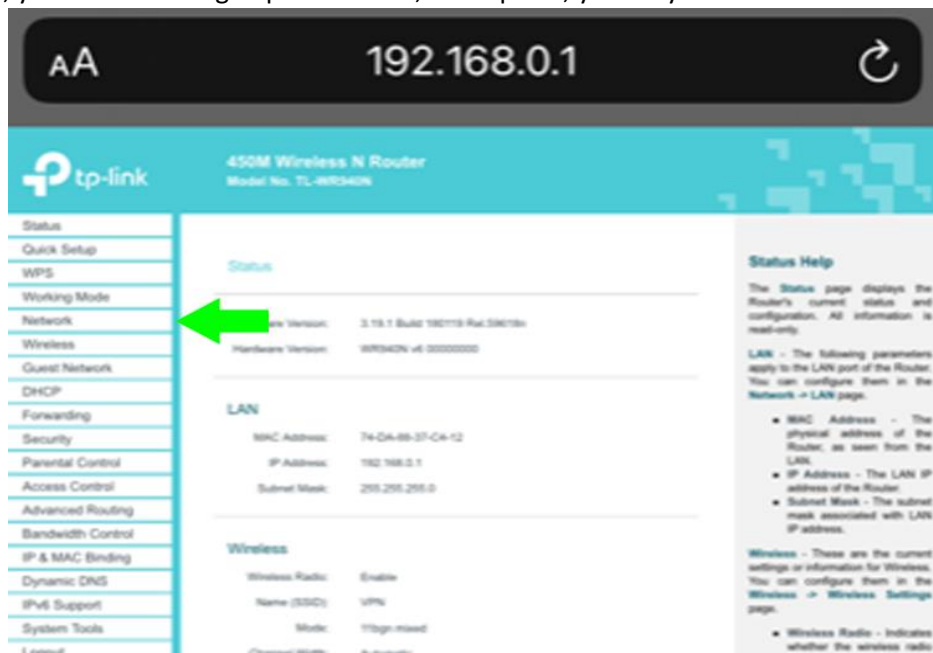

You will be presented with a Router login screen (see image below).

- Username: **admin**
- Pass: **admin**

The image shows the TP-Link router login interface. At the top, there is a dark grey header with 'AA' on the left, the IP address '192.168.0.1' in the center, and a refresh icon on the right. Below this is a teal banner with the TP-Link logo on the left and the text '450M Wireless N Router Model No. TL-WR940N' on the right. The main area is white and contains a login form with two input fields: 'Username' and 'Password', each with a small icon to its left. Below the fields is a teal 'Login' button.

Once logged in, you will see a large options menu, don't panic, you only need one section select "NETWORK"

The image shows the TP-Link router main menu after login. It features a teal header with the TP-Link logo and '450M Wireless N Router Model No. TL-WR940N'. On the left is a vertical menu with options: Status, Quick Setup, WPS, Working Mode, Network, Wireless, Guest Network, DHCP, Forwarding, Security, Parental Control, Access Control, Advanced Routing, Bandwidth Control, IP & MAC Binding, Dynamic DNS, IPv6 Support, System Tools, and Logout. A green arrow points to the 'Network' option. The main content area displays the 'Status' page, which includes hardware information (Firmware Version: 3.15.1, Build 180719, Rev 5.0(17b); Hardware Version: WR940N v6 20200202) and LAN settings (MAC Address: 74-DA-59-37-C4-12, IP Address: 192.168.0.1, Subnet Mask: 255.255.255.0). The 'Wireless' section shows 'Wireless Radio' as 'Enable', 'Name (SSID)' as 'VPN', 'Mode' as '11bgn-mixed', and 'Channel Width' as 'Automatic'. On the right, there is a 'Status Help' section with explanatory text for LAN and Wireless settings.

Upon Selecting Network, you will see the section to add your VPN details.

WAN Connection: **Change to L2TP**

Username: **YOURVPNUSERNAME**

Password: **YOURVPNPASSWORD**

Confirm: **YOURVPNPASSWORD**

Server Address: Select from the L2TP list at <https://hosts365.uk/index.php?rp=/knowledgebase/12/VPN-Server-List.html> or use the list below.

Note: These details are cAsE SeNsItIvE

Click Save and your settings are now active on the VPN server you chose.

To test you are connected to the VPN, whilst connected to the TP-Link with your new settings.

Go To: <https://whatismyipaddress.com> You will see your selected server and country!
